

THE RIGHT TO COUNSEL FOR TENANTS FACING EVICTION: ENACTED LEGISLATION

Even before COVID-19, there were over [3.6 million evictions filed every year](#), demonstrating the system has been in crisis for some time. And the stakes are severe because tenants who have been evicted don't just lose their immediate housing: they also face losses of mental and physical health, child custody, employment, educational attainment, and physical property. Those made homeless by eviction risk incarceration and criminal prosecution, and during COVID-19, evicted tenants faced increased [exposure to the virus](#). In addition, [even a filing of eviction](#), regardless of the outcome, reduces housing opportunities and can remain on a tenant's record for years. These consequences are not experienced equally: Black female renters face eviction [twice as often](#) as white tenants. Yet when facing an eviction, on average [only 4% of tenants are represented, compared to 83% of landlords](#).

Tenant representation decreases the likelihood and overall impact of these consequences. **Here's just a sampling of what we know about the effectiveness of right to counsel (sources available on our [website](#)):**

- **New York City:** 84% of represented tenants have remained in their homes, while the filing rate and default rate have decreased by 30%.
- **San Francisco:** 59% of represented tenants have remained in their homes, and of the 30% who did not remain in their unit, 70% received a favorable settlement.
- **Cleveland:** 93% of clients avoided an eviction judgment or an involuntary move. 83% of clients who desired rental assistance were able to obtain it, and of the 21% of clients who were unaware of rental assistance at the time they contacted Legal Aid, approximately 98% wanted rental assistance and Legal Aid helped 81% of those clients obtain it.
- **Boulder:** 63% of represented cases avoided eviction, which was a 26% increase.
- **Kansas City:** The pre-RTC eviction rate was 99% and in the first 3 months of RTC it was less than 20%. Most recently, of all the resolved cases, 91.5% of tenants have avoided eviction, compared to the 99% of tenants who were evicted before RTC.
- **Toledo:** Nearly 88% of tenants in closed cases avoided eviction.
- **Connecticut:** Of the 82% of clients that wanted to prevent an involuntary move, 71% achieved that goal.
- **WA State:** Tenants remained in their homes in more than 50% of closed cases where the result is known.

And here is a sampling of additional data on tenant representation effectiveness:

- **Oklahoma:** A [research brief](#) from Open Justice Oklahoma found tenant legal representation increased the odds of unit retention by 75%.
- **Massachusetts:** For a recent statewide COVID eviction legal help project providing full representation to low-income tenants, 90% of cases resulted in positive outcomes, with 70% of tenants remaining in their homes and 20% of tenants having more time to find a place to live.
- **California:** A [study](#) found that fully represented tenants stayed in their units three times as often as those receiving limited or no legal assistance. When tenants did have to move, fully represented tenants were given twice as long to do so.
- **Minnesota:** A [study](#) out of Hennepin County found that represented tenants were twice as likely to stay in their homes, received twice as long to move if necessary, and were four times less likely to use a homeless shelter than those without counsel. 78% of represented tenants left with a clean eviction record, compared to 6% of unrepresented tenants.
- **Denver, CO:** A [study](#) found that represented tenants remained in their homes 70-100% of the time, compared to 32% of unrepresented tenants. For unrepresented tenants, the dispossession rate was 43% (Denver Housing Authority cases) and 68% (private housing cases).

- **Overall:** Stout LLC, a financial analysis company that has [produced extensive right to counsel reports for numerous cities](#), has consistently found that a right to counsel leads to more than 90% of tenants avoiding disruptive displacement.

In recognition of the interests at stake, effectiveness of counsel, power imbalance between landlords and tenants, race equity considerations, and cost savings, the jurisdictions below have enacted a right to counsel for tenants facing eviction in just the past four years, and the movement is still growing. The movement's success has a great deal to do with the commitment and efforts of community organizers around the country. We at the [National Coalition for a Civil Right to Counsel \(NCCRC\)](#) support the efforts of organizers, legal services organizations, policymakers, and other stakeholders by providing technical support, campaign guidance, research resources, and supportive testimony.
